KEERTHI C

keerthichandrashekarr@gmail.com | +91 8792170105 | https://www.linkedin.com/in/keerthi-chandrashekhar21/ | https://github.com/Keerthiii21 | Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate with hands-on experience in software development, web technologies, and IoT-based projects. Proficient in Python, JavaScript, SQL, React.js, and Git, with experience developing full-stack applications and hardware-integrated solutions. Passionate about building scalable software and eager to contribute as an entry-level Software Engineer.

SKILLS

- **Programming:** Python, JavaScript, SQL, HTML, CSS
- **Frameworks:** React.js, Node.js, Bootstrap
- **Tools:** Git, Github, VS Code
- **Databases:** MongoDB, MySQL
- **Concepts:** REST APIs, Responsive Web Design, Object-Oriented Programming, Basic Data Structures & Algorithms

EXPERIENCE

GTRE (DRDO) – Project Intern July-Aug 2026

Engine Control Systems Division

- Assisted in the development and testing of a LabVIEW-based displacement measurement system.
- Worked with LVDT sensors and a stepper motor for system integration and calibration.
- Supported system testing, troubleshooting, and technical documentation under the guidance of senior engineers.

Edutainer India – Digital Marketing & SEO Intern April- May 2026

- Assisted in implementing SEO strategies to improve website visibility and search rankings.
- Created and managed digital content while supporting social media marketing and campaign execution.
- Monitored campaign performance and prepared reports to support marketing optimization.

PROJECTS

AI-Enhanced Pothole Detection & Monitoring System

Tech Stack: Python, OpenCV, CNN/YOLO, Raspberry Pi, React.js, Node.js, MongoDB

- Developed an AI-powered pothole detection system using computer vision to identify road damage and classify pothole severity.
- Integrated Raspberry Pi, camera, and GPS modules to capture pothole data and enable real-time location tracking.
- Built a web dashboard using React.js and Node.js to visualize pothole reports and support infrastructure monitoring.

GitHub: https://github.com/Keerthiii21/PatchPoint-Project

PainSight Syringe Infusion Pump

Tech Stack: Python, OpenCV, Raspberry Pi, Camera Module

- Developed a smart syringe prototype to assist with accurate injection site identification using computer vision.
- Integrated camera-based image processing with Raspberry Pi to support real-time guidance during syringe positioning.
- Designed the system to improve precision and enhance usability through hardware–software integration.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering
CMR Institute of Technology, Bengaluru | VTU
2022–2026 | CGPA: 8.02/10
