CAREER OBJECTIVE

2026 Electronics and Communication Engineering graduate with hands-on experience developing full-stack applications, integrating REST APIs, working with databases, and debugging software issues. Skilled in Python, JavaScript, SQL, Node.js, Express.js, and FastAPI, with project experience in application development and structured data handling. Strong problem-solving skills and a willingness to learn enterprise technologies, including Java and Spring Boot, while contributing to reliable, maintainable software solutions.

EDUCATION QUALIFICATION

- **Bachelor of Engineering – Electronics and Communication Engineering**
  CMR Institute of Technology | 7.9, 2026(Graduate)
- **Pre- University Course- Science**
  CMR-National-PU College | 78.16%, 2022
- **10th (state)**
  Poorna Prajna Education Centre | 88.16%, 2020

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, SQL, HTML5, CSS3
- **Frontend:** React.js, Vite, Bootstrap, responsive UI
- **Backend & APIs:** Node.js, Express.js, FastAPI, REST APIs, JSON, Socket.IO
- **Databases & Tools:** MongoDB Atlas, MySQL, SQLite, Git, GitHub, Postman, VS Code
- **AI / Integration:** OpenCV, CNN-based image classification, pre-trained model integration

PROJECTS

Title: AI enhanced pothole detection System -HAL Project
Description: Designed and implemented a smart pothole detection system as an HAL project to support proactive road maintenance using sensor fusion of LiDAR and camera data integrated with a Raspberry Pi platform. Captured road imagery and depth information were processed through a CNN-based model to classify road conditions and categorize pothole severity for prioritization. Developed a web-based dashboard for real-time data transmission and visualization, enabling efficient monitoring and decision-making for municipal authorities.
Tech Stack: Raspberry Pi, LiDAR sensor, camera module, Python, Embedded C, CNN model, OpenCV, TensorFlow, web dashboard integration.
Title: Pain- sight: Ai integrated pain detection-based syringe infusion pump
Description: Developed a low-cost AI-powered syringe infusion that automates fluid delivery based on patient pain detection. A camera captures facial expressions processed by a fine-tuned MobileNet model to classify pain levels in real time, triggering an Arduino-controlled infusion mechanism. The system demonstrates AI-driven healthcare automation aimed at improving patient care in resource-constrained environments.
Tech Stack: Arduino Uno, Stepper Motor, Camera Module, Python, pyTorch(MobileNet), OpenCV

INTERNSHIPS

GTRE (DRDO) – Project Intern Engine Control Systems Division July-Aug 2026

- Assisted in development and testing of a LabVIEW-based displacement measurement system.
- Worked with LVDT sensors and stepper motor for system integration and calibration.
- Supported system testing, troubleshooting, validation, and technical documentation under the guidance of senior engineers.

Edutainer India – Digital Marketing & SEO Intern April- May 2026

- Assisted in implementing SEO strategies to improve website visibility and search rankings.
- Created and managed digital content while supporting social media marketing and campaign execution.
- Monitored campaign performance and prepared reports to support marketing organization.

CO-CURRICULAR & EXTRA CURRICULAR ACIVITIES

- **Patents & Copy rights:** Filed a patent on "Hair Oil Dispensing Comb with Suction Mechanism".
- **Hackathons:** Participated in preliminary rounds of IEEE young professionals and the Social Hackathon.
- **Online Courses & Certifications:** QA Tester Fundamentals — ISKIMA, Python and flask framework, Android App Development, Responsive Web Design and Relational Databases
- **Technical clubs:**
  ETA Club- Event Coordinator: Managed and hosted technical events and workshops at the departmental level
  TAQ Club: Member & an Active participant in technical quizzes and group competitions.
- **Sports:** An active Badminton player, actively engaged in skateboarding as a personal discipline, reflecting balance, control, and physical agility.
- **NSS:** NSS Volunteer – Contributed to social initiatives through volunteering, awareness drives, and community support activities.

ACHIEVEMENTS

- Interhouse Carrom Champion – Multiple-time winner at school-level tournaments
- CR (1st & 2nd Sem) – Represented class in academic coordination and communication
- ETA Club- event organizer -Led planning and execution of student events
- Qualified for second round in IEEE young Professionals hackathon.

PERSONAL DETAILS

Date of Birth	: 21st May 2004
Gender	: Female
Nationality	: Indian
Linguistic competency	: English, Kannada, Telugu, Hindi
Hobbies	: Skateboarding, fashion designing, carrom, Art
